# Acoustic energy ae100 manual

surround is produced from polyether, very light due to the polyether's nature and micro bubbles give it a more flexible form so it could move in the magnet easily. Hence the sound quality differs. Allow to soak for 3-4 min. Some wrinkling of the new foam is normal and will subside as the adhesive cures. 7: Apply 1/8" bead of adhesive to flat lip on cone edge or to underside lip of foam if cone is angle attach style. 6: Small variances of less than 1/8" are OK. Prying it off until the original glue seam is broken. If you are precise, draw a line before gluing. Do you have a speaker repair service? Learn more about repair service here. 10: Use your finger tip to smooth the adhesive uniformly and then install the foam to the frame while the adhesive is still wet and tacky. Most of the speaker producing company uses foam surround. I have never repaired speakers before, can I repair them myself? Press lightly on top of the foam to distribute the adhesive. All files are provided under strict licence and reproduction without prior permission or for financial gain is strictly prohibited. If you have additional documentation please consider donating a copy to our free archive. 12: Apply adhesive to the top of the foam and install the gasket removed earlier (if applicable). Place the speaker gasket side down and allow to dry for 20 min. Slowly work your way around the gasket. It is heavier comparison to polyether and the motion of the rubber surround in the magnet is limited. You can move the foam and make adjustments as needed at this time. Foam surround vs Rubber surround? Smooth adhesive uniformly and immediately apply to cone. We are at service for 5 years as online shop and thousands of people successfully repaired their speakers themselves. 1: If there is a gasket on top of the old foam, Carefully remove it with the utility knife and set it aside to reuse later. Yes, we have. Rubber surround is produced from plastic Can I use the surround sticker for the dust cover? 2: Remove all and all foam waste from the speaker structure a cone. 4: Shave any remaining foam or frame glue with utility knife edge or wooden chisel, making sure not to damage the cone. Allow to dry for 20 min. It's going to hurt the little cone. Notice how the cone can be easily moved in one direction or another to easily find the "sweet spot" where there is no scraping or rubbing of the voice coil. The new surround is slightly larger than the speaker basket, can I cut the edges of it? See the repair-vice. Scrape any remaining foam from the back of the gasket. Be sure to center the foam on the cone and frame. 9: Insert the tip of the glue tube under the outer water of the foam edge to apply an adhesive bead around the frame. 8: Use your fingertip to smooth the adhesive evenly, then install the foam to the cone while the adhesive is still wet and sticky. 11: While the adhesive is still wet, exercise the cone by pressing evenly around the dust cap to center the cone and voice coil. One of my cerritos is worn, should I change the other too? 3: Apply foam remover to foam and paste waste around the edge of the structure and cone. It will attach foam or rubber surround, dust caps to all kinds of cones including poly, paper, kewlar and aluminum. The time to dry is 30 min. Use your fingers to rub the remaining foam parts from the edge of the cone. Remove as much foam as you can, but leaving a thin layer to be available. Install the new foam edge on the frame. In most cases, it is easier to install the new foam to the top of the cone, even if the original foam was installed after the cone. Do I need shorts? Shorts are not necessary to properly replace the speaker foam surram using etnemairassecen etnemairassecen acicerp oĀn \*Acov .oirjĀssecen emrofnoc amupse ed adrob ad onrexe ortemcĀid o erapa .ordauq o arap ednarg otium ©Ā onrexe oibjĀl o sam ,enoc me axiacne es adrob avon a eS .oraper e oviseda ed laicepse acincĀtĀt all the glue waste, but you should remove all the foam waste. Install the new foam edge on the cone. Carefully insert a sharp utility knife between the joint and the old surround. Centralization of the power© is easy and so precise. Notice! Do not apply the foam remover to the cone. You can cut the edges of the environment with scissors and overput the foam to make it smaller as needed to fit speaker basket. Be sure to center the foam on the cone.
